

EMERGENCY DEFIBRILLATOR

SAFE. RELIABLE. LIFE SAVING.

FOR MORE INFORMATION
VISIT ZAPSTAND.COM

ZAP STAND.

THE **ZAPSTAND** NETWORK IS A COORDINATED EMERGENCY RESPONSE SYSTEM SPECIALLY DESIGNED FOR HIGH TRAFFICKED PEDESTRIAN AREAS IN CITIES AND UNIVERSITIES ENSURING A BETTER OUTCOME WHEN A CARDIAC EVENT OCCURS. **CONTACT: 214-308-6239 / [ZAPSTAND.COM](https://zapstand.com)**

24/7 MONITORING

ZapStand is meant to be highly visible while remotely monitored 24/7/365 rather than requiring a bi-monthly visit from a technician to check on the unit.

911 CONNECTIVITY

AED is mag-locked in the red cabinet. User presses the backlit button on the silver panel and is immediately connected to 911 while the door is unlocked simultaneously.

SURVEILLANCE

3 cameras video and take pictures to both protect the unit and provide info to first responders.

GPS LOCATOR

A GPS unit in the AED bag is activated, and in real time, provides accurate pinpointed location of the patient to first responders saving time and saving lives.

MESSAGING

A 46" digital screen on the front and a 55" digital screen on the back provides marketing opportunities.
